Quarterly Workforce Indicator Tool (QWI)
What is QWI?

- QWI Explorer is a new, web-based analysis tool that enables comprehensive access to the full depth and breadth of the Quarterly Workforce Indicators (QWI) dataset.

- Through bar charts and interactive tables, users can compare, rank and aggregate QWIs across time, geography, and/or firm and worker characteristics on the fly.
What is QWI?

- The Beta release of QWI Explorer makes the entire QWI dataset available in a simple chart/table interface.
- The application's intuitive dashboard allows for the construction of pivot tables to compare and rank labor-force indicators such as employment, job creation and destruction, wages, and hires across a wide range of firm and worker characteristics.
The following states do not have QWI data available at this time:

- Massachusetts
- Puerto Rico
- U.S. Virgin Islands
Potential QWI Analyses Include:

- Longitudinal look at wages by worker sex and age across counties
- Ranking job creation rates of young firms across NAICS industry groups
- Comparing hiring levels by worker race and education levels across a selection of Metropolitan Areas.
Let’s Go On-line...

Longitudinal Employment Dynamics (LED) Extraction Tool

- **LED Extraction Tool** – The LED Extraction Tool enables streamlined access to the raw public-use data produced through the Local Employment Dynamics (LED) Partnership. This easy-to-use tool provides comma-separated value (CSV) files for the exact variables and characteristics requested by users. Currently, only the Quarterly Workforce Indicator (QWI) data are available in the LED Extraction Tool.
Thank You!!!
